WINDSTORM™

The “V-Ride” range of Stand-On mowers from SCAG, supplied in the UK by STM Co has had a new addition to complement the blowers in the Debris Management range:

The Windstorm is a 37HP stand-on driving unit based on the V-Ride. It has a front-mounted centrifugal blower with a massive 6000 cfm output. The intake size is 375mm and there is a directional output nozzle with angle control operated from the fully-featured and comprehensive dashboard. 10.5mph forward speed and up to 5mph reverse speed makes for a versatile and nimble machine.
Large size comfort cushion for the operator to lean against, plus large diameter padded steering controls that require minimal effort for the lever action make this a comfortable, powerful, versatile and productive machine.
