GRX®

BY INTERMERCATO

*A NEW **BEAST** ENTERS.*
***DEFINITELY** FIERCE.*

Maximum flexibility and exceptional performance

For mini and midi excavators

FLEXIBILITY

GRX gives you the possibility to choose between log grab, 4-finger, 5-finger grab and sorting grab.

GRX with its flexible universal hole pattern, is built for tilt rotators with angled excavator attachments, direct mounting of RMR compact rotators and for Intermercato WDR worm drives.

SIMPLIFIED CONSTRUCTION

All **GRX** grabs of a certain size share the same body, guide bars, shafts and cylinder.

GRX®
BY INTERMERCATO

LIGHT AND STRONG

The **GRX** series is made of steel from SSAB. The body is made of **Strenx®** high-strength structural steel 700, the claws of **Hardox®** 450 wear-resistant steel.
This brilliant combination of materials gives **GRX** maximum strength and ideal weight.

The bodies of all **GRX** grabs are bent in one piece. No unneccessary weldings.

SAFETY

Check valve as standard on **GRX** 15, 20 & 25 sorting grabs (EG model).
Check valve and accumulator optional on **GRX** 20 and 25.

Wide, bent safety sheet metal in **Strenx®** 700 under the body.

GRX®

LOG GRAB

*Bent body in **Strenx® 700** high strength structural steel*

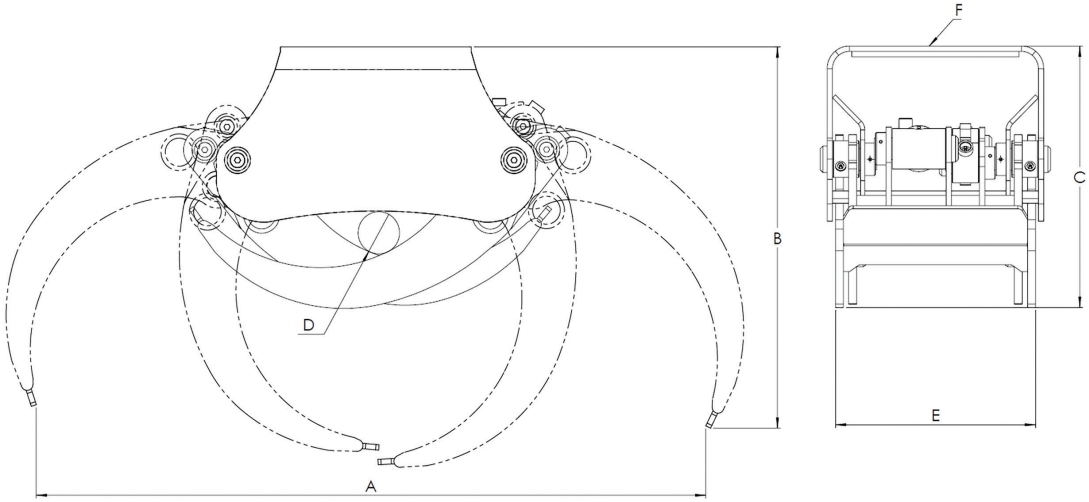

*Claws in **Hardox® 450** wear-resistant steel*

Check valve and accumulator optional on GRX 20 and 25

Universal hole pattern for

Angled excavator attachment | RMR compact rotator | WDR worm drive
